

Naton Academy

– Belt & Road Webinar

Naton Medical Group is committed to promoting the exchange of orthopedic technologies worldwide. Adhered to this idea, Naton has completed dozens of Sino-foreign exchange activities, inviting foreign surgeons to learn techniques in China, while sending Chinese surgeons to participate in academic exchanges abroad during the past few years.

Due to the impact of COVID-19, Naton is still unable to hold any offline activities for now. This year, Naton plans to invite overseas orthopedic surgeons to take part in webinars to exchange orthopedic techniques and share cases. The epidemic could only restrict travels, but cannot stop communications.

We hope you will join us!

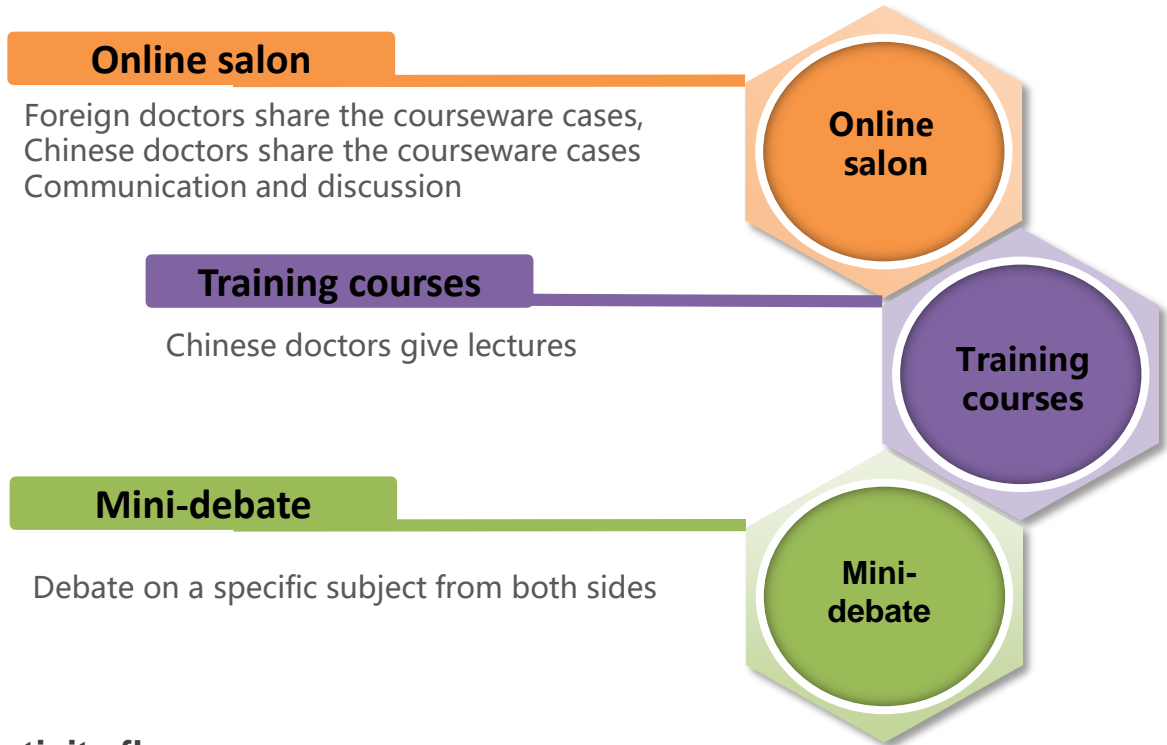

IRENE Marketing Team

■ **Language and Software:** English & Zoom

■ **Activity Topic:** trauma, spine, and joints

■ **Activity Mode**

1V1 online communication between client's hospital and Chinese hospital

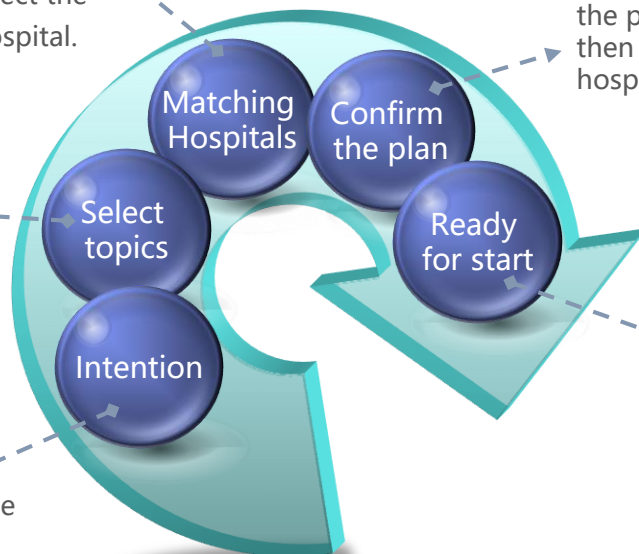

■ **Activity flow**

According to the topics and activity mode confirmed by the client hospital to select the targeted Chinese hospital.

Naton Academy provides the program and plan, then confirms with both hospitals.

The client hospital selects the activity mode and topic.

The client hospital intends to communicate with Chinese hospitals.

Confirm activity time and process, test software.
